

Exploring Charcoal Drawing

Instructor, Karen Bash

This class is offered through SF Recreation and Parks Dept., so all materials for the class are included in the class fee and provided to every student. In the first class the instructor will go over the materials to be used, so you will know what supplies to obtain if you want to continue working on your own.

Recommended

Charcoal cannot be sharpened in a standard pencil sharpener. Please bring your own exacto knife or utility knife for this purpose. Charcoal is very messy, so bring your own washcloth or rag in a plastic bag or other container so that you can have a damp cleaning rag for your hands.
